

Epson Stylus[®] Photo R1900 Technology

Course launched February 1, 2008

Slide 1

In this course you'll learn about the two key technologies behind the Epson R1900 photo printer: the all-new Epson UltraChrome Hi-Gloss 2 Ink set and the cutting-edge Radiance technology that delivers unprecedented print quality. Select a topic in the menu at left or use the controls at the bottom of the screen to continue.

Slide 2

To learn about the incredible new Epson UltraChrome Hi-Gloss 2 Ink set, you'll open a document describing the key features of new ink set, read it on-screen or print it, then answer interactive questions. Click the icon to open the document in a new window.

Slide 4

The new Epson UltraChrome Hi-Gloss 2 Ink is an 8-ink system with new ink formulations plus Red and Orange inks to deliver a larger color gamut, improved warmth in facial tones, and a glossy difference you can see and feel. It sets the new standard in glossy color photography.

Slide 5

In addition to a new ink set, the R1900 also features Radiance, a new technology from Epson that maximizes the color gamut. To learn about this technology, you'll open a Technical Brief, read it on-screen or print it, and then answer interactive questions. Click the icon to open the document in a new window.

Slide 7

The all-new Radiance technology uses an advanced system to optimize the way Epson UltraChrome Hi-Gloss 2 ink colors are mixed to deliver: Reduced grain, optimized color gradation, and improved color constancy.

Slide 8

With the Epson UltraChrome Hi-Gloss 2 Ink set and Radiance technology, the R1900 will solidify Epson's leadership in the photography market by setting a new standard in glossy color photography with: a dramatic color difference you can see, a dramatic glossy difference you can feel, and pigment ink stability and longevity required by serious photographers.
